V. TIMEZONE NOTE

The GA4 property for jacksonholt.com is configured in Spain CEST (UTC+2). The dateHourMinute export field records timestamps in that timezone. Two conversion methods are possible:

Method	Conversion	Session 3 (Beirut)	Gap to @RacketeerX (3:20 PM EDT)
UTC-4 (used in this proceeding)	Treat raw as UTC; subtract 4 hrs	1:34 PM EDT	1 hr 46 min
Strict CEST→EDT	Subtract 6 hrs from raw CEST	11:34 AM EDT	3 hrs 46 min

The UTC-4 method produces the 1 hour 46 minute elapsed time documented in Section IV.B of the Declaration and is used throughout this proceeding for consistency with prior filings. Raw CEST timestamps are provided in every table above so the Court may apply either method independently.

I declare under penalty of perjury under the laws of the United States of America that the foregoing is a true and correct extract of Google Analytics 4 data for the property jacksonholt.com, and that the timezone conversions and session counts are accurately reported.
