Counsel,

On March 12, 2026, at the request of federal investigators, I was interviewed at the GSA Headquarters office on F Street in Washington, D.C. for approximately five hours by OIG Special Investigators from the General Services Administration and the Department of Defense. The scope of this initial interview included the capture, award, execution, and termination of the HII–Cyberlux contract, and a technical discussion regarding both drone and communications technology. The interview covered my knowledge based on conversations with Cyberlux executives and employees, FOIA records, and publicly available information.

Since that time, I have continued to cooperate fully, including providing additional materials and information as requested.

I provide this for your awareness in connection with the matters currently before the Court.

Jim Curtin
